WORD FROM OUR AUCTION TEAM

PERLICH BROS AUCTION MARKET LTD.

In the hub of the livestock industry since 1967

WELCOME TO THE 20th ANNUAL WESTERN ANGUS ANGUS BULL SALE!

We have worked with Wes and Wendy over the last ten years in conducting their bull sale and we are very pleased to work with them again. The Merrill family's hard work and effort put into their breeding program is evident with this year's lineup of bulls.

Western Angus has a strong reputation for ease of calving, and performance in their bulls. You don't want to miss this opportunity to incorporate one of their top quality bulls into your herd!

Welcome to our 20th Annual
WESTERN ANGUS
Bull Sale!

The Wes Merrill Family
Wes and Wendy with children Austin, Trista, Tylor, JD, Kash, Kendra, Kasey, Ben, Kyler, Mateo, Sawyer, Scarlet, Brexton, and Letty.

Customers and Fellow Cattlemen,

Welcome to our 20th Annual Bull Sale.

We look forward to seeing you sale day and talking over this years offering. The bulls are fed to last, not win shows. The feet and longevity were on our mind when we decided how to implement our feed program. Our bulls are on a protein pellet and silage diet--our second attempt at feeding them at the farm.

Our genetics are typically low birth with lots of growth. We use AI to source new genetics and have some impressive new pedigrees this year. Our cattle are supposed to work for you and not the other way around. Maintenance free cattle are our end goal.

Please feel free to stop by and have a look. Sale day is a new day, we will have dinner at 5:00pm and Sale at 6:00 pm on Wednesday, March 20th.

We will have a buyer draw this year as well as a volume buyer prize.

Sincerely,
Wes & Wendy Merrill,
Kash, Kasey, Austin & Tylor

EXPLANATION OF EPD’s

EPD’s are predictions on how bull rates against his own contemporary group and the rest of the breed. EPD’s evaluate group averages and offspring’s performance, however they cannot predict individual performance or weights.

For example, if Bull A (WW EPD of +10) and Bull B (WW of +60) were randomy mated with 10 similar cows, we would expect the group avg. weaning wight of Bull A’s offspring to be 50 lbs. lighter than Bull B’s (60 - 10 = 50).

Angus Breed Average EPD’s:

The BLACK ANGUS breed average for all 2023 calves registered:

BW	WW	YW	Milk	TM
+2.0	+52	+92	+23	+49

BW: Birth Weight—expressed in pounds, is a prediction of a sire’s ability to transmit birth weight to his progeny.

WW: Weaning Weight—expressed in pounds, is a predictor of a sire’s ability to transmit weaning growth to his progeny.

YW: Yearling Weight—expressed in pounds, is a predictor of a sire’s ability to transmit yearling growth to his progeny.

Milk: A predictor of a sire’s genetic merit for milk and mothering ability as expressed in his daughters.

TM: Total Maternal—1/2 Weaning Weight + Milk. This index is the expected amount of pounds that a sire’s daughters’ calves will differ from the breed average assuming the daughters are mated to sires of average genetic merit for Weaning Weight.
